Projects

PROJECT TITLE: FEES MANAGEMENT SYSTEM– Personal Project. November-December 2023

- Project Overview: Provide a brief description of the Fees Management System, emphasizing its purpose, such as automating fee collection, invoice generation, and payment tracking in an educational institution.
- Technology Stack: Specify the technologies used, such as Java for the programming language and Java Swing for the graphical user interface.
- User Interface Design: Highlight your role in designing the user interface using Java Swing, creating forms for data entry, buttons for actions, and areas for information display..

PROJECT TITLE: CONNECT 4 GAME APPLICATION (JAVA, JAVAFX) – Personal Project. October 2023

- Designed and developed a feature-rich Connect 4 game application from the ground up, utilizing Java and JavaFX for the frontend. The project serves as a testament to my proficiency in software development, game programming, and user interface design.
- Enhanced my problem-solving skills, particularly in game logic and AI algorithms.
- Gained experience in user interface design, promoting an improved user experience.
- Developed strong documentation skills and expertise in ensuring software reliability through thorough testing.

Work Experience

Startup Websites (Freelancer) - Techbethink.com – Lucknow, UP October 2020 - October 2021

- Drafted, edited, and published content for internet platforms to boost organic search engine traffic.
- Carried out keyword and competitor research to define relevant content topics.
- Applied SEO principles and tools such as Google Analytics, Google Search Console, and SEMrush to optimize content.
- Monitored and appraised website performance to discover avenues for improvement and conducted periodic data analysis to detect and resolve issues.

Certification

TCS iON Career Edge – October-2023
